

St. Olaf's National School

The Astro pitch will create a year-round, all-weather surface for pupils' yard time, ensuring consistent access to outdoor play and learning regardless of weather conditions. It will also support movement and regulation breaks for pupils with Additional Educational Needs, providing an accessible space to help pupils regulate, refocus, and participate fully in the school day.

In addition, the pitch will support school sports teams for both boys and girls, including (but not limited to) GAA, camogie, hurling, soccer (5-a-side and 11-a-side), tennis, Olympic handball, athletics and golf.

Our Vision

St. Olaf's N.S. will begin development of a new Astro pitch in May 2026, with the pitch scheduled to be completed for the start of the 2026–2027 academic year (August 2026). The total cost of the project is €268,750.00.
